DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 13, 2006 has been entered.
2. Applicant's amendment and accompanying remarks filed November 13, 2006 are acknowledged.

Priority

3. Examiner acknowledges receipt of the Korean priority document KR2001-0049386. The certified copy of the Korean priority document KR PCT/KR02/01514 has not been received. Additionally, Korean priority document KR PCT/KR02/01514 is not a national stage application. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2, 4-5, 9-11 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Hwang et al., *Band gap tuning of new light emitting conjugated polymers*.

Hwang discloses a series of copolymers

R = 2-ethylhexyl

that have been synthesized from comonomers

The reference reads on the instant claims when R₁ and R₂ represent alkoxy groups and R₃ and R₄ represent the alkyl group 2-ethylhexyl.

Art Unit: 1774

6. Claims 4-5 are rejected under 35 U.S.C. 102(a) as being anticipated by Beaupre et al., *Optical and Electric Properties of π -Conjugated Polymers Based on Electron-Rich 3,6-Dimethoxy-9,9-dihexylfluorene Unit*.

The reference discloses a comonomer with the structure

The reference reads on instant claims 4 and 5 when R₁ and R₂ represent the alkyl group C₆H₁₃.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 1774

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1, 6-8 and 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hwang et al., *Band gap tuning of new light emitting conjugated polymers*.

Hwang discloses a series of copolymers

that have been synthesized from comonomers. The Hwang reference does disclose investigating the fabrication of the Hwang copolymers in light emitting diodes (see page 202). The copolymers of the Hwang reference provide a full color range of emission. Therefore, it would have been obvious to one of ordinary skill in the art to use the Hwang copolymers in an electroluminescent device in order to obtain a full range of color emission at a maximum emission of 620 nm.

Response to Arguments

9. Applicant's arguments filed November 13, 2006 have been fully considered but they are not persuasive. Applicant has submitted the certified copy of the Korean priority document KR

2001-0049386. A translation of Korean priority document KR 2001-0049386 has not been received. The Office has not received a certified copy of the Korean priority document KR PCT/KR02/01514. Additionally, the present application is not a national stage application. The Do-Hwang et al., reference is prior art by another.
